

**Town of North Rustico Council
REQUEST FOR DECISION
Topic: MSC Funding**

Date: February 8 th , 2019	Request No: 2019-08
---	-------------------------------

Person: Patsy Gamauf	Representing: Town/Utility
--------------------------------	--------------------------------------

<p>Background: The Utility requires an additional wastewater treatment tank for their system. It is required for two reasons – the first is in case we have a heavy rain event or large melt, the tank will act as an extra area for the overflow instead of having untreated sewage going out in the harbour. The second reason is for the eventual expansion in the number of users to the sewer system. The total cost of the project is \$545,000. 50% is funded by the MSC fund, 40% through our Gas Tax and 10% by the Utility.</p>
--

<p>Request: To make application to the Municipal Strategic Component Fund for the wastewater treatment tank expansion. The Utility will be responsible for their share of the project.</p>

<p>Advantages To prepare for large melts and for new users.</p>	<p>Disadvantages The cost.</p>

Staff Comments	
-----------------------	--

CAO's Review / Comments	The Utility is acting very proactive instead of reactive. This will allow for the Utility to pay \$54,500 for the expansion which should not create an impact in the rates.
